

## Understand basic text mode for filters activities

### Task - Filter out tasks where I've marked "Done with my part"

The following text mode will exclude tasks where a user has marked "Done with My Part." All you have to do is create a task filter, add any filter rules you want, then switch to text mode and paste the code below after any text mode you see in the filter.

**WARNING** - This is not intended for use in Calendar filters.

```
EXISTS:1:$$OBJCODE=ASSGN  
EXISTS:1:taskID=FIELD:ID  
EXISTS:1:status=DN  
EXISTS:1:status_Mod=notin  
EXISTS:1:assignedToID=$$USER.ID
```

### Task - Show me all tasks awaiting my approval

```
approvalProcessID_Mod=notblank  
currentUserApproversMM:ID=$$USER.ID  
currentUserApproversMM:ID_Mod=in  
currentUserApproversMM_Join=allowingnull
```

### Task - Show me all tasks I have approved

Create a task report with whatever filters you want, then go to the Filter tab and click on Switch to Text Mode. Add this code to whatever is already there:

```
approvalProcessID_Mod=notblank  
approverStatuses:approvedByID=$$USER.ID  
approverStatuses:approvedByID_Mod=in
```

### Task - Show me all tasks that have at least one cross project predecessor

```
predecessorsMM:ID_Mod=notblank  
predecessorsMM:projectID=FIELD:projectID  
predecessorsMM:projectID_Mod=ne
```

### **Task - Show me all tasks I assigned to others**

Create a task report with whatever filters you want, then go to the Filter tab and click on Switch to Text Mode. Add this code to whatever is already there:

**WARNING** - This is not intended for use in Calendar filters.

```
EXISTS:1:$$OBJCODE=ASSGN  
EXISTS:1:taskID=FIELD:ID  
EXISTS:1:assignedByID=$$USER.ID
```

This will show you all tasks where the logged in user assigned at least one of the current assignees. If assignees were assigned by multiple people only the name of the first person who assigned someone will appear as “Requested By” on the task landing page.

### **Task - Show me all tasks that are Complete - Pending Approval**

```
status=CPL:A  
status_Mod=in
```

### **Issue - Show me all issues that are Complete - Pending Approval**

```
status=CPL:A  
status_Mod=in
```

### **Project - Show me all projects that are Complete - Pending Approval**

```
status=CPL:A  
status_Mod=in
```

### **Note - Show me all comments I’m tagged in**

```
tags:userID=$$USER.ID  
tags:userID_Mod=in
```

### **Parameter/Custom Field Report - Show me custom fields that are not attached to a custom form (very useful in cleanup efforts)**

```
EXISTS:A:$$EXISTSMOD=NOTEXISTS  
EXISTS:A:$$OBJCODE=CTGYPA  
EXISTS:A:parameterID=FIELD:ID
```
